

If you see an error regarding Offline Search:

- 'Online Search' is only available if you have a current subscription to SiriusXM Guardian:
 - This was part of their 'Search & Go' Feature
 - Many owners had SiriusXM Guardian for a free period after time of vehicle purchase. You may not have noticed that it expired and are just seeing the 'Offline Search' Error for the first time
 - You will typically only see this error if searching for a destination using the 'Search All' option.
 - If you search by Address, POI, etc you will not see that screen
 - If you see this error screen – press 'Offline Search' and you should see a screen where you can continue to enter a destination using your system's map database.
 - 'Offline Search' simply means the system will search the map database that currently loaded to the navigation system (versus accessing an online database)
 - This error is not related to the map database or from doing a map update
 - If you have further questions or issues regarding this feature – please direct them to Uconnect: <https://www.driveuconnect.com/>
