

CHANGING GENERAL ROUTING OPTIONS:

- Press 'Nav Settings'
- Scroll down using down arrow, then press 'Route Options'
- Select your preferred options

ROUTING TO A SPECIFIC DESTINATION:

- When you are in process of starting a new route:
 - Before you press 'GO' – You can see if you are in: Fast, Short or Eco route. (most people use 'fast route'
 - **Note: It usually defaults to whatever you used for the most recent route.** So if you change it temporarily for one route – you will need to go back to your normal setting next time you start a new route
 - Press 'Alternatives' to see the other options

SAVING A POINT ON THE MAP:

- If you can't find a specific address in the map database or a specific Point of Interest – you can still save that location using several different ways”
 1. Use 'Point on Map' or even Geo-Coordinates to locate it on the map. Once you find the correct area of the map you can touch the screen of that area and save it to your Favorites
 2. If your vehicle is at the point you want to save – you can press 'Information' from the main Nav screen, then 'Where Am I?' Then press the 'Save' Button to save it to your Favorites

- You can Save any location to your Favorites. You can delete the current name and give it any other preferred name.
